

A r t i s a n   d ' é m o t i o n s

From the bowels of the Earth,  
shaped by time and the elements,  
lava turned to stone is the basis of our work.

Volvic lava stone is a natural material extracted from  
the Nugère quarries in the heart of the Auvergne  
Volcanoes Regional Nature Park.

It carries all the nobility  
and power of nature.

**First used in its raw form for emblematic constructions,**  
such as cathedrals and fountains, Volvic lava stone convinces with its unfailing  
strength.

**Then, in its enamelled form, it became iconic.**

It is adorned with color and inscriptions, and for a long time set the standard for  
signage, including its use for the original "Metropolitain" Paris metro signs.

**Today, enameled lava is synonymous with luxury, refinement and character for  
exceptional, 100% customized projects.**

It offers infinite design solutions for the architectural, hotel, retail and interior design  
sectors.

**From Sydney to New York, London to Tokyo, Pyrolave is a showcase for rare  
and precious expertise.**

# U N I Q U E K N O W - H O W

## Extraction

Natural extraction, volume limitation, site restoration.

## Cutting

Block selection and processing

## Finish

Enamel application

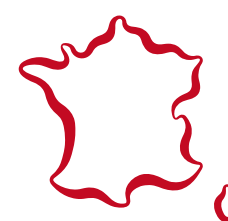

## Firing in kilns

12h at 1000°C

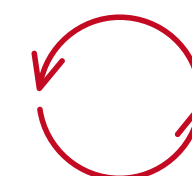

## LIVING HERITAGE COMPANY

A rare and highly technical know-how.

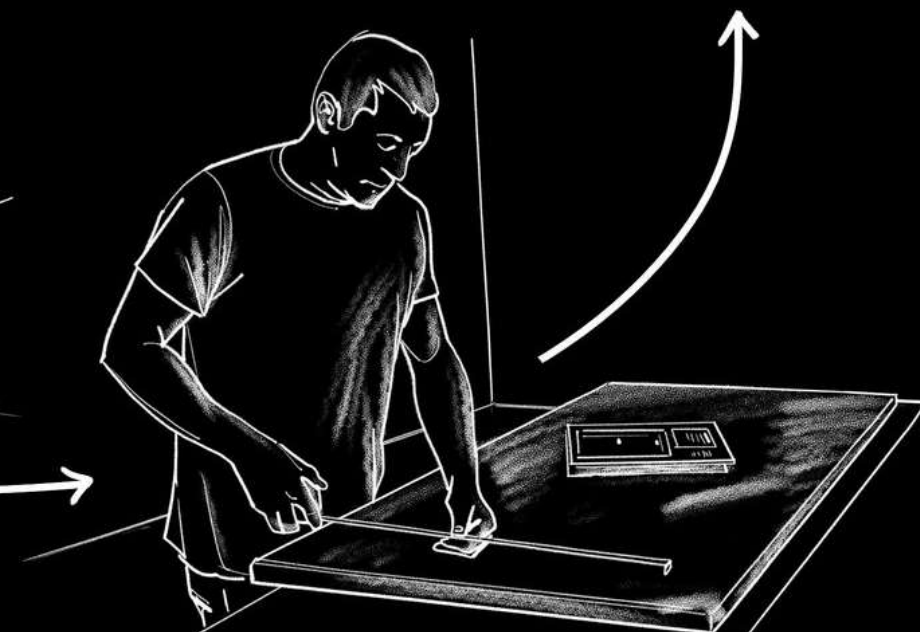

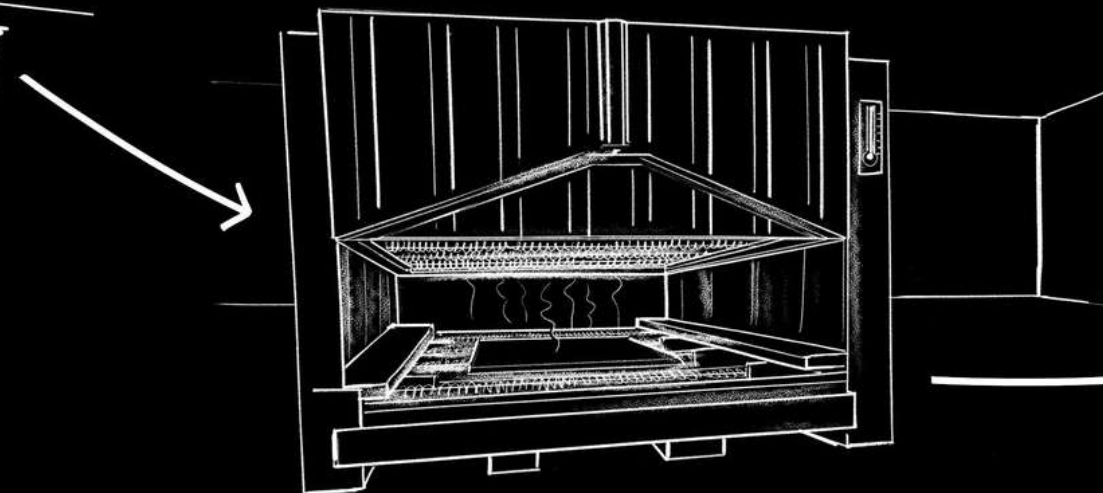

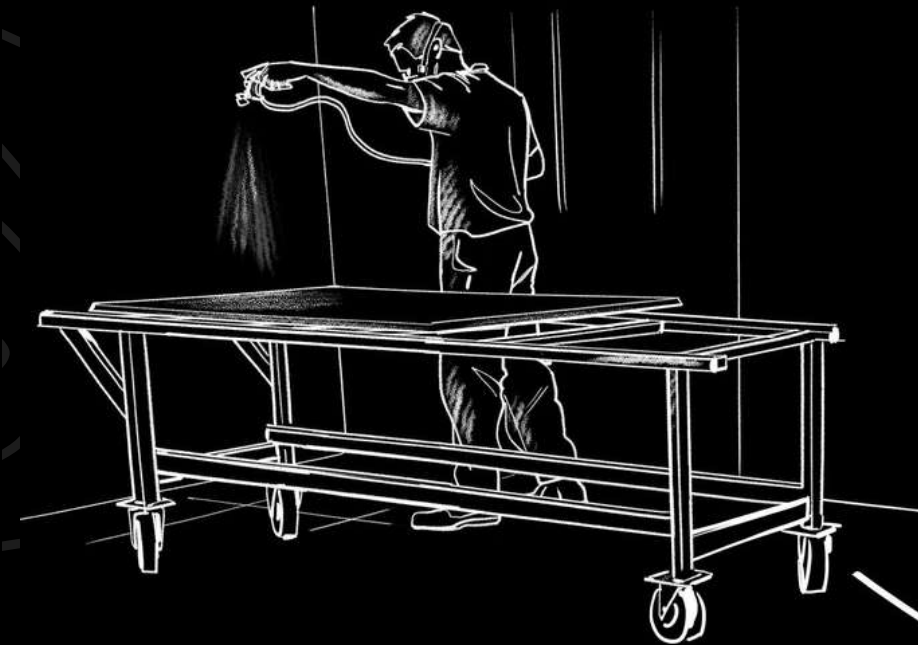

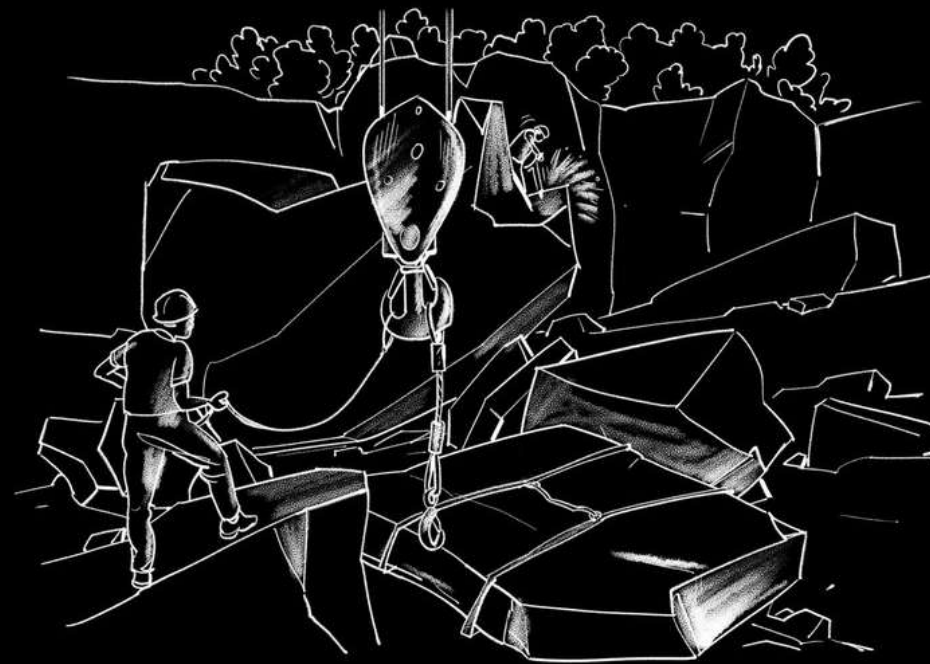

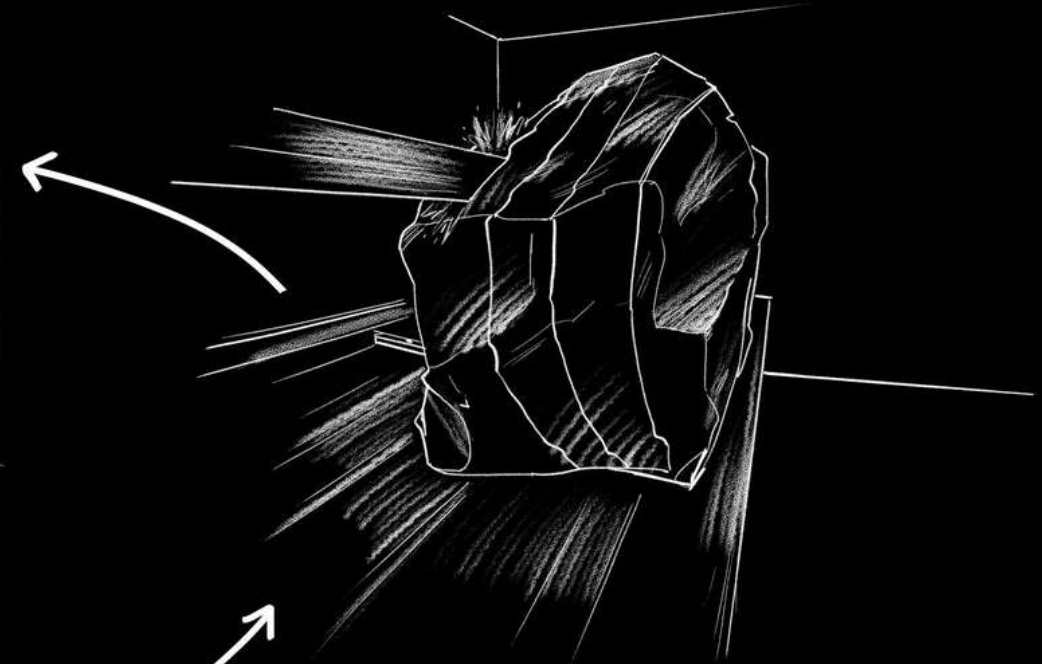

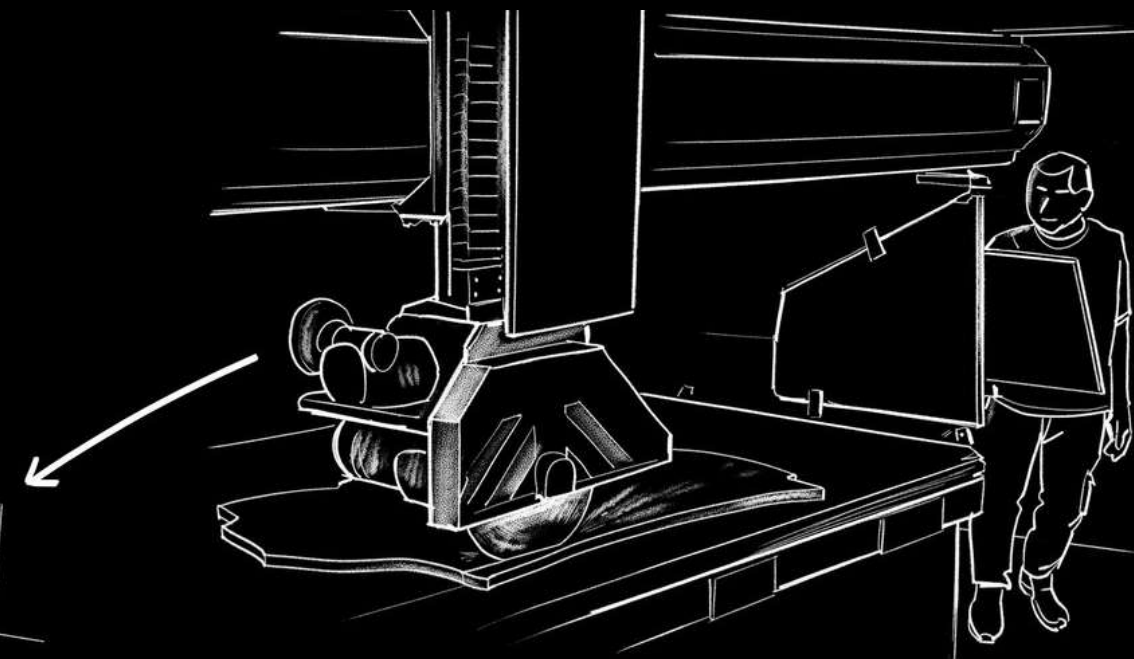

## 400KM AT MOST

From our quarries in Volvic, through processing in our workshops in Tarn-et-Garonne, to the finished product.

## END-TO-END

The guarantee of the highest standards, with control of production from A to Z.

# W I T H   R E S P E C T   F O R Q U A R R I E S

Lava is a real treasure. We protect it and the environment with sustainable quarrying.

## "NATURAL" EXTRACTION

No chemicals are used for extraction, which is carried out manually or mechanically. To avoid visual pollution, we restore each quarry as it is extracted.

## MONITORING NATURAL FAULTS

We study the faults present in the rock to optimize the blocks extracted.

## LIMITING VOLUMES

Responsible, reasoned extraction, with no more than 1,000 tonnes of rock extracted per year.

# **F O R   S U S T A I N A B L E P R O J E C T S**

## **FROM NATURE**

Gathered from the ground, rock is offered to us by nature, without the need for artifice.

## **LONG LIFE**

Sturdy and durable, Pyrolave surfaces can last for over 100 years in hotels, restaurants, individual housing, etc.

## **LEED PROJECTS**

Suitable for low environmental impact projects: HQE, LEED, BREEAM.  
Carbon impact study available on request.

# I N F I N I T E C O L O U R S

## A PERMANENT COLLECTION

34 colours: the timeless classics, the trendsetters and the quirky ones

## ENDLESS POSSIBILITIES

Tailor-made colour based on a Pantone or Ral reference, a piece of fabric or even a work of art

## A UNIQUE FINISH

Gloss, matt, gradient, opaque, transparent

### THE MASTER ENAMELLERS, OUTSTANDING CRAFTSMEN CAPABLE OF :

Finding the exact shade for your project from our thousands of carefully guarded recipes and secrets.

Creating new blends for a unique colour, developed on request and especially for you.

A smooth, precise glaze application technique that only comes with years of training.

# A U N I Q U E S I G N A T U R E

**A natural product, created by nature and the elements.**

## **THE "TRESSAILLAGE", THE DNA OF ENAMELLED LAVA**

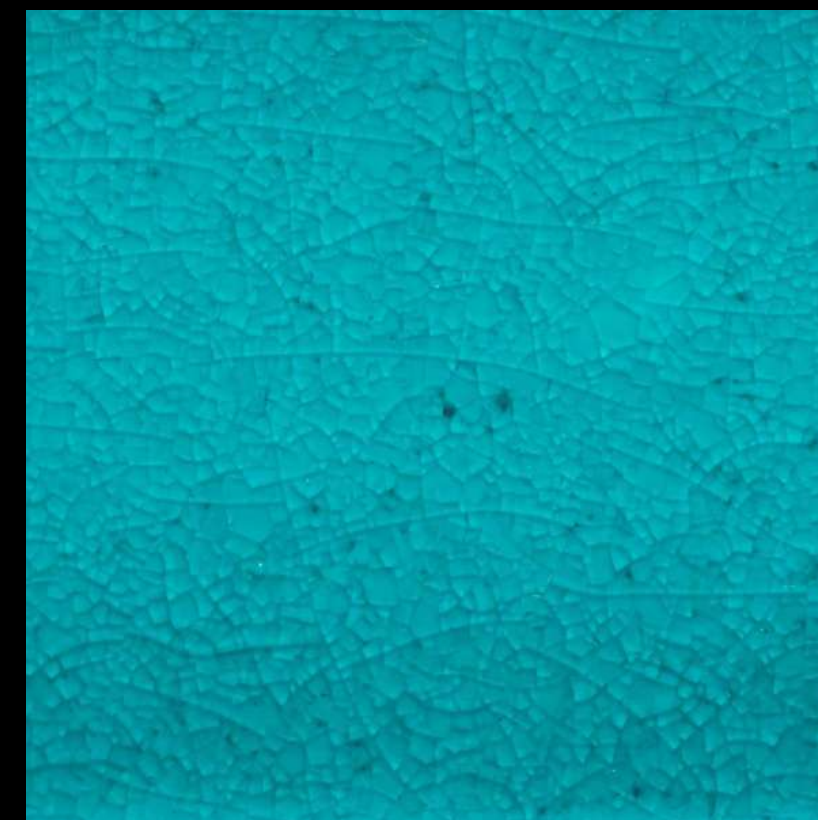

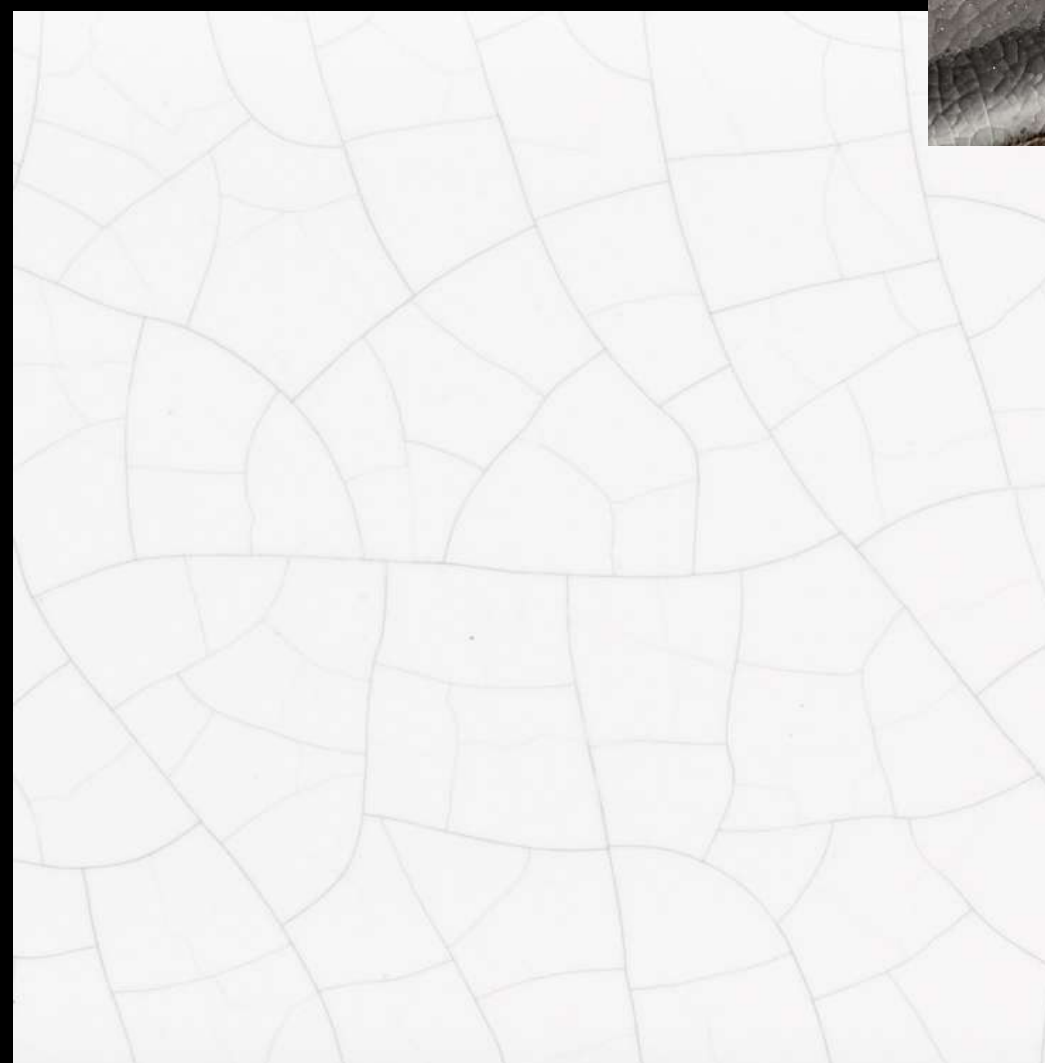

It appears when enamelled lava cools, in the form of a random pattern that makes each piece an exception.

- Visible on light & dark backgrounds
- Reveals the depth of colours and variations in shades

## **THE SIGNATURE**

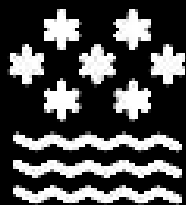

Like any jewel, each piece of enamelled lava can have remarkable characteristics, resulting from the strength of the elements.

- Grains of pigmentation
- Shaded edges
- Wires
